Excursion to Central Switzerland:

After the bus trip to Lucerne a ship will take us on Lake Lucerne. Coffee will be served on the ship.

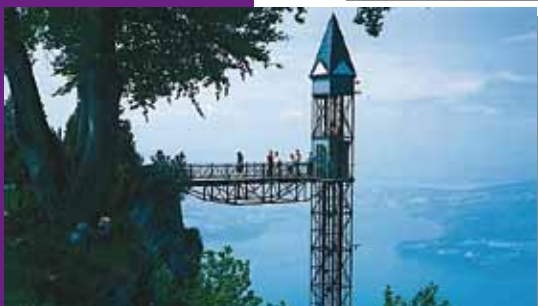

On the ship: Short lecture about the installed rock fall measures at the site "Lopper".

We are landing at "Kehrsiten" where we take the "Bürgenstock" funicular railway, the first build in Switzerland (opened in 1888).

After a walk from about 30 minutes we take the "Hammetschwand" lift. For the walk you need good sport shoes. With its summit station at 1132 m, the "Hammetschwand" lift is Europe's tallest outdoor lift.

If the weather allows us, we will have a magnificent view from the top where we also have lunch. Afternoon, we take the lift down and take a walk to the bustransfer back to Zurich.
